BIOCHEMISTRY AND CELL BIOLOGY/ BIOCHIMIE ET BIOLOGIE CELLULAIRE
VOLUME 66 (1988)
SUBJECT INDEX/INDEX DES MATIÈRES

Acetylation glycoprotein liver microsome Golgi acetyltransferase 1152
Acetylcholinesterase cooperativity lithium sodium diaphragm 382
Acetylglucosaminidase beta enterocyte neonate 126
Acetylglucosaminyltransferase lymphocyte 889
Acetylglucosaminyltransferase oviduct microsome branched glycan formation 1134
Acetylspermidine heart hypertrophy aorta stenosis 1018
Acetyltransferase liver microsome Golgi glycoprotein acetylation 1152
Achlya thymidine kinase multiple form 318
Acidosis proton ATPase kidney medulla 20
Aconitase Ehrlich ascites neoplasm cytoplasm mitochondria 792
Actin protein formation fertilization Stronglyocentrotus 780
Actinobacillus capsule polysaccharide structure 998
Active site carboxyl protein HPr Streptococcus 76
Active site cellulase carboxyl inactivation Schizophyllum 871
Adenovirus gene E1A transactivation factor 578
Adhesion bacteria host protein review 541
Adipocyte high density lipoprotein binding 986
Adipose brown uncoupling protein mRNA obesity 193
Adipose GDP binding uncoupling protein cold 1226
Adipose insulin protein phosphorylation 296
ADP ribosylation chromatin structure review 626
Affinity chromatog agglutinin oligosaccharide 449
Agglutinin affinity chromatog oligosaccharide 449
Alfalfa aminobutyrate formation glutamate glutamine 1342
Alfalfa root nodule asparagine formation 1349
Allosterism pyruvate kinase Phycomyces 148
Amine oxidase dopamine deamination stereospecificity 853
Amino acid heart choline transport 418
Aminobutyrate formation alfalfa glutamate glutamine 1342
Amphotericin B interaction ergosterol 177
Antibody cytochrome c oxidase subunit V 1210
Antibody glucose transporter detection erythrocyte membrane 1126
Antibody monoclonal screening hybridoma 910
Antibody monoclonal Trypanosome variant surface glycoprotein 1231
Antigen CHAD 1 oligosaccharide structure 1333
Antigen determinant Trypanosome variant surface glycoprotein 1231
Antigen D2 T membrane nucleus structure 928
Antigen O Salmonella lipopolysaccharide structure 107
Antigen O structure Pasteurella lipopolysaccharide 1055
Antigen O structure Salmonella lipopolysaccharide 1066
Aorta smooth muscle benzylamine oxidase 821
Aorta stenosis heart hypertrophy acetylspermidine 1018
Apolipoprotein B liver membrane binding 1238
Arachidonate prostaglandin diabetes blood insulin 901
Arachidonate release erythrocyte membrane phospholipase A2 795
Arginine essential glucose phosphate sodium symporter 1005
Arom hydrocarbon hydroxylase hepatoma 1278
Arsenite stress heat shock protein 862
Arthrobacter cAMP phosphodiesterase 454
Ascites Ehrlich neoplasm aconitase cytoplasm mitochondria 792
Asparagine formation alfalfa root nodule 1349
Asparagine tRNA formation erythropoiesis 772
ATP synthase mitochondria review 677
ATPase activation potassium Vigna mitochondria 250
ATPase endogenous inhibitor depletion cirrhosis tissue 218
ATPase mitochondria review 677
ATPase proton kidney medulla acidosis 20
Autolysis calcium dependent proteinase muscle 1023
A6 heat shock protein stress 862
Bacillus spore specific catalase 2 707
Bacteria adhesion host protein review 541
Band 45 protein erythrocyte antibody 1126
Benzylamine oxidase aorta smooth muscle 821
Bilirubin degrading enzyme orange peel 1248
Binding protein pyruvate kinase gene Neurospora 958
Blood cell white pH review 245
Blood insulin diabetes prostaglandin arachidonate 901
Blood plasma haptoglobin glycosylation variant chicken 208
Brain tumor edema NMR water review 1100
Branched glycan formation oviduct microsome acetylglucosaminyltransferase 1134
Brassica heat shock protein 1303
Brown adipose uncoupling protein mRNA obesity 193
B875 photosynthesis complex Rhodobacter 442
Cadmium cadystin Schizosaccharomyces 288
Cadystin Schizosaccharomyces cadmium 288
Calcium dependent proteinase autolysis muscle 1023
Calcium mobilization tubulovesicle stomach gastrin 279
Calcium myoblast fusion phospholipid metab 1110
Calmodulin phosphorylation protein kinase liver 922
cAMP heart choline uptake phosphatidylcholine formation 231
cAMP phosphodiesterase Arthrobacter 454
cAMP transformation property Kirsten virus p21 54
Cancer anticancer activity cell review 478
Capsule polysaccharide Actinobacillus structure 998
Capsule polysaccharide Streptococcus structure 758
Carbohydrate variant haptoglobin chicken blood plasma 208
Carbon flow phosphoenolpyruvate carboxylase Coccochloris 93
Carboxyl active site protein HPr Streptococcus 76
Carboxyl cellulase active site inactivation Schizophyllum 871
Carboxylase phosphoenolpyruvate carbon flow Coccochloris 93
Carboxylase phosphoenolpyruvate sorghum tissue mRNA 1287
Casein kinase inhibition divalent cation 238
Catalase 2 spore specific Bacillus 707
Cation chorionic gonadotropin receptor 1258
Cation divalent inhibition casein kinase 238
Cation inorg pyrophosphatase thermostability Saccharomyces Escherichia 25
Cation monovalent acetylcholinesterase cooperativity diaphragm 382
Cattle thymus satellite DNA chromatin 256
cDNA mRNA germin wheat cloning 100
CDP diacylglycerol hydrolase lung microsome mitochondria 425
Cell cycle control model 467
Cell cycle human histone gene 132
Cell differentiation cancer anticancer activity review 478

Cell interaction Dictyostelium development glycoprotein review 1089
Cell interaction epithelial mesenchymal 530
Cell membrane bound calmodulin phosphorylation 922
Cell membrane hormone receptor review 549
Cellular retinoate binding protein newborn mouse 750
Cellulase active site carboxyl inactivation Schizophyllum 871
cGMP phosphodiesterase metarhodopsin I phototransduction model 979
CHAD 1 antigen oligosaccharide structure 1333
Chironomus chromosome puff hsp70 1177
Cholesterol redistribution Intralipid lipoprotein erythrocyte 1312
Choline transport heart amino acid 418
Choline uptake heart cAMP 231
Choriogonadotropin uterus binding salt 1258
Chorionic gonadotropin detn immunoradiometry 910
Chorionic gonadotropin receptor cation 1258
Chromatin satellite DNA thymus cattle 256
Chromatin structure ADP ribosylation review 626
Chromatog affinity agglutinin oligosaccharide 449
Chromosome puff hsp70 Chironomus 1177
Chymotrypsin hatching enzyme sea urchin 1200
Cirrhosis ATPase endogenous inhibitor depletion tissue 218
Cloning germin mRNA cDNA wheat 100
Cobaltochelatase ferrochelatase liver 32
Coccochloris phosphoenolpyruvate carboxylase carbon flow 93
Cold GDP binding uncoupling protein adipose 1226
Cold ischemia protein formation heart hyperthermia 13
Cold uncoupling protein brown adipose obesity 193
Collagen culture fibroblast glycosaminoglycan formation 116
Collagenase formation periodontium fibroblast 167
Colon mucin rabbit 1045
Con A lymphocyte nucleus matrix protein 40
ConA inhibition nucleotidase lymphocyte 715
Conformation rhodopsin solid aggregate photochem activity 161
Control model cell cycle 467
Cooperativity acetylcholinesterase lithium sodium diaphragm 382
Correction NADP formyl methenyl methylenetetrahydrofolate liver 459
Crop plant protoplast fusion organelle review 665
Culture collagen fibroblast glycosaminoglycan formation 116
Culture glycosaminoglycan mammary epithelium neoplasia 309
Current elec photosystem differentiation thylakoid 436
Cyclohydrolase methenyltetrahydrofolate bifunctional trifunction complex liver 66
Cystic fibrosis taurine uptake fibroblast 702
Cytochrome c oxidase subunit function structure 1218
Cytochrome c oxidase subunit V antibody 1210
Cytochrome P 450 liver methyl sterculate 138
Cytoplasm aconitase Ehrlich ascites neoplasm 792
Cytosol NADPH iodothyronine deiodinase activation liver 71
Deamination dopamine amine oxidase stereospecificity 853
Deazaadenosine methionine metab liver 1032
Dehydrogenase methylenetetrahydrofolate trifunction bifunctional complex comparison 66
Deiodination iodothyronine thioredoxin liver 460
Deoxypyrimidine kinase Achlya 318
Development Dictyostelium cell interaction glycoprotein review 1089
Development histone complement review 636
Development intermediate filament assocd protein 184
Development troponin C heart muscle 880
Dexamethasone dolichol formation inflammation 1265
Diabetes maternal fetus lung glycogen surfactant 396
Diabetes prostaglandin arachidonate blood insulin 901
Diaphragm acetylcholinesterase cooperativity lithium sodium 382
Dictyostelium development cell interaction glycoprotein review 1089
Diet phospholipid mol species mammary tumor 1163
Differentiation cell cancer anticancer activity review 478
Differentiation limb muscle triiodothyronine frog 724
Differentiation macrophage lectin 1169
Disulfide minor lamin heteropolymer liver nucleus 1295
Divalent cation inhibition casein kinase 238
DNA strand break granulocyte superoxide 374
DNA transfection model oncogenesis review 594
DNA uracil glycosylase detn fluorometry 157
Dolichol formation dexamethasone inflammation 1265
Dopamine deamination amine oxidase stereospecificity 853
D2 T antigen structure membrane nucleus 928
Early gene regulation SV40 virus review 567
Edema brain tumor NMR water review 1100
Egg histone RNA sea star 1040
Ehrlich ascites neoplasm aconitase cytoplasm mitochondria 792
Elec current photosystem differentiation thylakoid 436
Embryo histone RNA sea star 1040
Embryo intermediate filament assocd protein 184
Enterocyte beta acetylglucosaminidase neonate 126
Enzyme bilirubin degrading orange peel 1248
Enzyme collagenolytic periodontium fibroblast 167
Enzyme hatching sea urchin chymotrypsin 1200
Epithelial mesenchymal cell interaction 530
Epithelium pigment inositol uptake glucose 951
Epithelium pigment retina inositol transport 942
Epoxypentylglucopyranosyl glucopyranoside synthesis cellulase inactivation 871
Ergosterol amphotericin B interaction 177
Erythrocyte cholesterol redistribution Intralipid 1312
Erythrocyte glucose nucleoside transporter swine 839
Erythrocyte membrane arachidonate release phospholipase A2 795
Erythrocyte membrane glucose transporter detection antibody 1126
Erythrocyte polyphosphoinositide phosphohydrolase localization 199
Erythrocyte water of hydration 1186
Erythroid differentiation tRNA formation 772
Erythroleukemia heat shock protein 691
Erythropoiesis initiator methionine tRNA formation 772
Escherichia inorg pyrophosphatase thermostability cation 25
Eukaryote heat shock gene transcription review 584
Eukaryote protein transport review 1253
Ferrochelatase cobaltochelatase liver 32
Fertilization actin protein formation Stronglyocentrotus 780
Fetus lung glycogen surfactant diabetes maternal 396
Fetus troponin C heart muscle 880
Fibroblast glycosaminoglycan formation culture collagen 116
Fibroblast periodontium matrix protein formation 167
Fibroblast taurine uptake cystic fibrosis 702
Fibrosis cystic taurine uptake fibroblast 702
Filament intermediate assocd protein embryo 184
Fluorometry uracil DNA glycosylase detn 157
Formyl methenyl methylenetetrahydrofolate synthetase NADP liver 66
Freezing tolerance plant review 650
Frog triiodothyronine limb muscle differentiation 724
Gastric mucus pepsin inhibitor 367
Gastrin calcium mobilization tubulovesicle stomach 279
GDP binding uncoupling protein cold adipose 1226
Gene early regulation SV40 virus review 567
